Have you seen the bees at work in your garden? If you watch them flying, you will notice that they fly from flower to flower. You may also be able to see them sucking the nectar or sticky fluid from flowers. The nectar is changed into honey and it is stored in the cells of the bee hive. Bees do not live alone. They live with other bees in a large family. Each family has a hive to live in. A beehive is made up of cells or rooms. Thousands of bees live a hive. There are three types of bees in a hive. They are the queen bee, the drones, and the workers. The queen is the head of the family of bees. Her chief work is to lay eggs. The drones are the males in the beehive. They are very lazy and do not work. There are about two to three thousand drones in each hive. The workers attend to all the work of the hive. They build their home on trees or in the hollow of trees. They fly out to the fields, forests and gardens to collect nectar. They also bring water to the hive. They protect the hive from their enemies. They feed their queen bee and look after her young ones. There are about thirty to forty thousand worker bees in each hive. All these bees the queen, drones and the workers live and work together.

Most animals can swim. Such animals as dogs, cats, horses, deer and cattle can swim when they first go into the water. But men have to learn to swim. Everybody should learn how to swim. Swimming is the best exercise because when swimming you use all the muscles of the body. It also gives you great pleasure. Knowing how to swim may one day save one's life in a boat accident or shipwreck. Sometimes swimmers can save the lives of others. Boys and girls should be taught to swim. It is an art much easier to learn in childhood than in later life. Those who have learnt swimming in their childhood, get used to being in deep water and have no fear of it at all.
